[Second Publication.]

BAY OF BENGAL—ORISSA COAST.

The buoys in False Point harbour in position.

In continuation of Notice to Mariners No. 213 of the 30th November, issued by this Office, the Port Officer, False Point, has given further notice, that Reddie Head Spit having shoaled to the northward, the outer Spit buoy has been shifted about 120 feet north of its former position into 21 feet reduced; also the inner Spit buoy has been shifted 100 feet N. $\frac{1}{2}$ W. of its former position into 24 feet reduced.

In consequence of the Reddie Head flat having shoaled to the westward, the Reddie Head Flat buoy, which had been swept away during the recent cyclone, has been placed 100 feet to the westward of its former position in 12 feet reduced.

All the buoys in the harbour are now in position.

EATON W. PETLEY,
Port Officer of Calcutta.

AUSTRALIA—KEPPEL BAY.

Discovery of rock reported by Pilot Hannah; and also of a Pinnacle rock near Bald Rock.

IN continuation of Notice to Mariners No. 122, dated 6th July last, issued by this Office, the Port Master, Brisbane, has given notice (No. 30A. of 1891) that the Harbour Master, Rockhampton, reports having found the rock reported by Pilot Hannah (27-5-91), and notified in Notice to Mariners No. 18 of 1891. It lies with about 9 feet 6 inches of water over it, with the following compass bearings:—

Bald Rock	...	N.W. by N. $\frac{1}{2}$ N.
South point of Humpy Island (just open with Wedge Island)	...	S.W. $\frac{1}{2}$ W.

Captain Sykes also reports having found a pinnacle rock about 5 cables E. by S. from Bald Rock with from 5 to 7 feet of water over it.

Sunken rocks in Tsu sima sound.

The British Admiralty has given notice (No. 517 of 1891) of the existence of the three undermentioned sunken rocks lying near the fairway of Tsu sima sound (Takeshiki harbour):—

1. A sunken rock (*Karakashi se*) with 3½ fathoms water on it lies with the north-east extreme of Flat island (*Majishima*) bearing S. ½ E., distant 5 cables, and Utsuno saki W. ½ N.

2. A sunken rock (*Imosaki se*) with 2½ fathoms water on it lies with Finger point (*Inomaki*) bearing S.S.E. ½ E., distant 2½ cables, and the north extreme of Flat island W.S.W.

3. A sunken rock (*Nakazone*) with 4½ fathoms water on it lies with Observatory rock (*Benten jima*) bearing W. by S. ½ S., distant 4½ cables, and Strata rock N. by W. ½ W.

AUSTRALIA—PIONEER RIVER ENTRANCE.

Flat Top island light-house—Sector of red light over Taroba rock.

The British Admiralty has given notice (No. 522 of 1891) that a sector of red light is shown from Flat Top island light-house, through an arc of about 6°, over Taroba rock; the northern edge of the sector, bearing West, defines the north-east extreme of the rock.

The position of Taroba rock is also indicated by the undermentioned leading marks, which intersect at its north-east extreme. Flat Top island light-house in line with a white square painted on the rocks just above high water mark on that island, bearing West; and two white marks on Round Top island in line, bearing about S. W. by S. ½ S.

Approximate position of light-house, lat. 21° 9½' S., long. 149° 16½' E.

(Variation 7° Easterly in 1891.)

AFRICA—ZANZIBAR ISLAND.

The system of buoyage established in the approaches to Zanzibar harbour.

THE British Admiralty has given notice (No. 531 of 1891) that the following system of buoyage has been established in the approaches to Zanzibar harbour:—

Approaching Zanzibar harbour, red buoys should be left on the starboard hand, black buoys on the port hand (consequently the colours of the two Southern pass buoys are reversed, but in order to prevent confusion, the old buoys are for the present kept in position). The buoys recently placed are *can* buoys:—

- (1) A *can* buoy, black and red chequered, is moored in $3\frac{1}{2}$ fathoms water on the southern edge of Seagull shoal, with White Black house bearing E. by N. $\frac{1}{2}$ N., distant $1\frac{1}{4}$ miles, and large house on Bet el Ras S.S.E.
- (2) A black *can* buoy is moored in 5 fathoms water on the bank northward of Bet el Ras with Bububu house bearing E. by N. $\frac{1}{2}$ N., distant $6\frac{1}{2}$ cables, and Large house on Bet el Ras S. by E.
- (3) A black *can* buoy is moored in 5 fathoms water, about half a cable seaward of the edge of the bank off Bet el Ras, with Bububu house bearing N.E. $\frac{1}{2}$ N., and Large house on Bet el Ras S.E., distant 3 cables.
- (4) A red *can* buoy is moored in $6\frac{1}{2}$ fathoms water near the eastern edge of Chapani reef, with White stone pillar bearing N.E. by E. $\frac{1}{2}$ E., distant $5\frac{1}{2}$ cables, and Square white house S. $\frac{1}{2}$ W.
- (5) A red *can* buoy is moored in 7 fathoms water near the eastern edge of Chapani reef, with White stone tower bearing N.E. $\frac{1}{2}$ E., distant $6\frac{1}{2}$ cables, and Square white house south.
- (6) A black *can* buoy is moored in 5 fathoms water near the eastern edge of Kisiki reef, with Mbwani house bearing E. by S. $\frac{1}{2}$ S., distant $1\frac{1}{4}$ miles, and Conspicuous house on Ras Buyu S.S.E. $\frac{1}{2}$ E. The old buoy (red) near the above mentioned buoy remains in position for the present.
- (7) A red *can* buoy is moored in 6 fathoms water near the western edge of Mtwana reef, with Mhwani house bearing E.N.E. distant $1\frac{1}{4}$ miles and Conspicuous house on Ras Buyu S.E. $\frac{1}{2}$ E. The old buoy (black) near the above mentioned buoy remains in position for the present.

The depths given are at low water ordinary spring tides.

(Variation 9° Westerly in 1891.)

NOTICE TO MARINERS No. 232.

[First Publication.]

CHINA SEA—BORNEO.

Fixed harbour light on Sandilands rock—Kudat harbour entrance.

In continuation of Notice to Mariners No. 57, dated 23rd March 1891, issued by this Office, the British Admiralty has given notice (No. 543 of 1891) that the light on Sandilands rock is exhibited:—

Sandilands rock light is a *fixed* harbour light of low power; it shows *white* between the bearings of N. by W. $\frac{1}{2}$ W., through west, and W. by S. $\frac{1}{2}$ S.; *red* between S. W. $\frac{1}{2}$ S. and S. by W. $\frac{1}{2}$ W.; *red* between S.E. $\frac{1}{2}$ E. and E. $\frac{1}{2}$ S.; and *white* between E. by N. $\frac{1}{2}$ N., through north, and N. by W. $\frac{1}{2}$ W.; in all other directions it is obscured. It is elevated 7 feet above high water, and should be seen in clear weather from a distance of 2 miles.

The light-house, erected on piles, is about 10 feet high.

Approximate position, lat. $6^{\circ} 52' 20''$ N., long $116^{\circ} 54' 3''$ E.

Also that the *fixed* *white* light, previously shown from the fort at Kudat, has been discontinued.

NOTICE TO MARINERS—No. 223.

[First Publication.]

AUSTRALIA—CAPE BOUGAINVILLE.

Sunken rocks and shoals in the Inner and Outer Routes.

THE British Admiralty has given notice (No. 552 of 1891) of the existence of the undermentioned, sunken rocks and shoals lying in the Outer and Inner Routes, off Cape Bougainville, the result of recent examination of the locality.

Outer Route.

1. A rock (*Oliver rock*) consisting of a coral head, with 9 feet water over it, and 25 fathoms close around, lies with the south extreme of Cassini island bearing N. 80° E., distant 4 $\frac{3}{10}$ miles. The sea was not seen to break on this rock, the *Penguin* passed over it without observing any sign of shall water.

Approximate position on Admiralty charts, lat. 13° 56 $\frac{1}{2}$ ' S, long. 125° 39 $\frac{1}{2}$ ' E.
NOTE.—The rock marked awash in lat. 14° 6' 30" S., long. 125° 35' E., does not exist.

2. A shoal (*Bassett-Smith shoal*) about one mile in diameter, with general depths of 5 to 6 fathoms, and 50 fathoms around, with a head of 20 feet near its western edge, is situated in approximately lat. 13° 16' 50" S, long. 125° 50' E. The sea did not break on this shoal, and there was no appearance of danger in the vicinity.

3. *Penguin shoal*, situated in approximately lat. 13° 6' S, long. 126° 4 $\frac{1}{2}$ ' E., has a least depth of 6 fathoms over it.

4. A rock (*Warn rock*) consisting of a small coral head, with 6 fathoms over it, lies in approximately lat. 13° 8 $\frac{1}{2}$ ' S., long. 126° 11' E.

Inner Route

1. A coral pinnacle (*Lee rock*) with 3 feet water on it, and 10 to 17 fathoms close around, lies with Pascal island summit bearing S. 83° W., distant 7 $\frac{1}{2}$ miles, or in approximately lat. 14° 2' S., long. 125° 52' E. The *Penguin* passed twice within a few feet of this rock, but no indication of danger was seen.

2. A coral shoal (*Toncred shoal*), 7 cables in diameter, with 3 to 7 fathoms over it, and 16 to 22 fathoms around, lies with Low rocks summit bearing No. 56° W., distant 2 miles, or in approximately lat. 14° 3 $\frac{1}{2}$ ' S., long. 126° 0' E.

3. The extensive reef charted north of Gibson point does not exist, but there is a rock (*Fury rock*) awash at high water, lying with the islet north of Gibson point bearing East, distant 1 $\frac{1}{2}$ miles. A reef dry at low water, extends 4 cables north-west of this rock, and foul ground for a distance of 1 $\frac{1}{2}$ miles north of it. Approximate position, lat. 13° 56 $\frac{1}{2}$ ' S. long. 126° 4' E.

4. *Bishop rocks* consist of a small group of coral heads, drying 2 feet at low water, and lying with the north extreme of Troughton island bearing S. 75° E., distant 2 $\frac{1}{10}$ miles, or in approximately lat. 13° 42 $\frac{1}{2}$ ' S. long. 126° 12' E.

5. A coral reef, with 2 fathoms over it, lies with the north extreme of Troughton island bearing S. 50° E., distant 6 $\frac{1}{10}$ miles, and is separated by a deep channel from the south point of Eastern Holothuria reef. Approximate position, lat. 13° 39 $\frac{1}{2}$ ' S., long. 126° 9 $\frac{1}{2}$ ' E.

6. *Branch Banks* consisting of two coral shoals with 6 and 7 fathoms over them, lie with the north extreme of Troughton island bearing S. 18° W., distant 8 $\frac{1}{10}$ miles, or in approximately lat. 13° 35 $\frac{1}{2}$ ' S., long. 126° 17' E. Depths of 6 fathoms were obtained for a distance of one mile east of this position.

CAUTION.—As in the neighbourhood of the dangers off Cape Bougainville the tides are strong, the banks and reefs steep-to, and the water unusually turbid, great care is necessary when navigating in the locality.

The depths given are at low water spring tides.

NOTICE TO MARINERS—No. 224.

[First Publication.]

AUSTRALIA—VICTORIA.

Uniform system of buoyage.

The British Admiralty has given notice (No. 533 of 1891) that the following uniform system of buoyage, somewhat similar to that adopted in the United Kingdom, was and will be established at ports in the Colony of Victoria, at the dates hereinafter mentioned:—

- (1) The term Starboard Hand shall denote that side which would be on the right hand side of the mariner, either going with the main stream of flood, or entering a harbour, river or estuary from seaward; the term Port Hand shall denote the left hand of the mariner under the same circumstances.

- (2) Buoys showing the pointed top of a cone above water shall be called *conical*, shall be painted red, and shall always be Starboard Hand buoys, as above defined.
- (3) Buoys showing a flat top above water shall be called *can*, shall be painted black, and shall always be Port Hand buoys, as above defined.
- (4) Buoys showing a domed top above water shall be called *spherical*, and when used to mark middle grounds shall always be distinguished by horizontal stripes of white colour.
- (5) Surmounting beacons, such as Staff and Globe, &c., shall always be painted of one dark colour.
- (6) Staff and Globe shall only be used on Starboard Hand buoys. Staff and Cage on Port Hand, Diamonds at the outer ends of middle grounds, and Triangles at the inner ends.
- (7) Buoys for marking Submarine Telegraph Cables shall be painted green, with the word *Telegraph* painted thereon in white letters. Mooring buoys shall be continued as heretofore. Gas buoys shall be painted red or black to correspond with the side of the channel on which they may be moored.
- (8) The buoyage of the West, South, and Geelong channels, port Phillip, will be altered to conical and *can* shaped buoys.
- (9) The buoyage of Sorrento and Cole's channel, port Phillip, also of Western port, port Albert, and Corner inlet, will remain of the same shape as heretofore, but all starboard hand buoys or beacons shall be painted red, and all port hand buoys or beacons shall be painted black.
- (10) The alterations in the buoyage of the several ports and channels have been and will be made during the following months and years:—

Western port	September 1891.
Port of port Albert	October 1891.
Port of Geelong, and entrance thereto from port Phillip	November 1891.
West channel, port Phillip	February 1892.
Port of Corner inlet	March 1892.
South channel, port Phillip	June 1892.
- (11) **BUOYING AND MARKING OF WRECK.** All buoys and topsides of vessels used for marking wrecks shall be painted green, with the word *Wreck* painted thereon in white letters, and when practicable shall be moored near to the side of the wreck next to mid-channel.
- (12) When a wreck-marking vessel is used, she shall exhibit:—

By day: Three balls 20 feet above the level of the sea, two placed vertically at one side of the vessel, and one on the other side, the single ball being on the side nearest to the wreck.

By night: Three fixed white lights, similarly arranged, but not the ordinary riding light.

[First Publication.]

AUSTRALIA—MONTALIVET ISLANDS.

Existence of certain reefs lying near the island.

THE British Admiralty has given notice (No. 564 of 1891) that information has been received from Commander W. U. Moore, H.M. Surveying vessel *Penguin*, dated 17th September 1891, of the existence of the undermentioned reefs lying near Montalivet islands, the result of recent examination of the locality:—

1. *Ingram reef* originally reported by Mr. H. Lee, commanding the Adelaide S.S. Company's vessel *Rob Roy*, is one mile in length in a north-west and south-east direction,

at three cables broad, with depths of 28 to 30 fathoms around. The shallowest part, a small patch of small extent, is awash at low water, and lies with the northern Montalivet island bearing S. by W., distant $6\frac{1}{2}$ miles, or in approximately on Admiralty charts lat. $14^{\circ} 6' 55''$ S., long. $125^{\circ} 20' 45''$ E. The sea does not usually break on this reef except near low water. The *Penguin* passed twice within a mile of it, before finding it, and though the weather was favourable, no indication of shoal water was seen.

2. *Albert reef* lying westward of the West Montalivet island, appears to be detached from that island, but vessels should not attempt to pass between. The north-west part which dries at low water is situated in approximately lat. $14^{\circ} 11'$ S., long. $125^{\circ} 6'$ E.

3. *Rob Roy reefs* extend about 6 miles in a north and south direction, with a breadth of about 3 miles. The western breakers lie in approximately lat. $14^{\circ} 25'$ S., long. $124^{\circ} 50'$ E.; the northern breaker is situated in approximately lat. $14^{\circ} 22'$ S., long. $124^{\circ} 52'$ E. About half a mile south-east of the northern breaker there is a sand cay, which is awash at half tide.

CAUTION.—As in the neighbourhood of the dangers near Montalivet islands the tides are strong, the banks and reefs steep-to, and the water unusually turbid, great care is necessary when navigating in the locality.

The depths given are at low water spring tides.

[Second Publication.]

AFRICA—ZANZIBAR ISLAND.

The system of buoyage established in the approaches to Zanzibar harbour.

THE British Admiralty has given notice (No. 531 of 1891) that the following system of buoyage has been established in the approaches to Zanzibar harbour:—

Approaching Zanzibar harbour, red buoys should be left on the starboard hand, black buoys on the port hand (consequently the colours of the two Southern pass buoys are reversed, but in order to prevent confusion, the old buoys are for the present kept in position). The buoys recently placed are *can* buoys:—

- (1) A *can* buoy, black and red chequered, is moored in $3\frac{1}{2}$ fathoms water on the southern edge of Seagull shoal, with White Block house bearing E. by N. $\frac{1}{2}$ N., distant $1\frac{1}{2}$ miles, and large house on Bet el Ras S.S.E.
- (2.) A black *can* buoy is moored in 5 fathoms water on the bank northward of Bet el Ras with Bububu house bearing E. by N. $\frac{1}{2}$ N., distant $6\frac{1}{2}$ cables, and Large house on Bet el Ras S. by E.
- (3.) A black *can* buoy is moored in 5 fathoms water, about half a cable seaward of the edge of the bank off Bet el Ras, with Bububu house bearing N.E. $\frac{1}{2}$ N., and Large house on Bet el Ras S.E., distant 8 cables.
- (4.) A red *can* buoy is moored in $6\frac{1}{2}$ fathoms water near the eastern edge of Chapani reef, with White stone pillar bearing N.E. by E. $\frac{1}{2}$ E., distant $5\frac{1}{2}$ cables, and Square white house S. $\frac{1}{2}$ W.
- (5.) A red *can* buoy is moored in 7 fathoms water near the eastern edge of Chapani reef, with White stone tower bearing N.E. $\frac{1}{2}$ E., distant $6\frac{1}{2}$ cables, and Square white house south.
- (6.) A black *can* buoy is moored in 5 fathoms water near the eastern edge of Kisiki reef, with Mbweni house bearing E. by S. $\frac{1}{2}$ S., distant $1\frac{1}{2}$ miles, and Conspicuous house on Ras Buyu S.S.E. $\frac{1}{2}$ E. The old buoy (red) near the above mentioned buoy remains in position for the present.
- (7.) A red *can* buoy is moored in 6 fathoms water near the western edge of Mitwana reef, with Mbweni house bearing E.N.E. distant $1\frac{1}{2}$ miles and Conspicuous house on Ras Buyu S.E. $\frac{1}{2}$ E. The old buoy (black) near the abovementioned buoy remains in position for the present.

The depths given are at low water ordinary spring tides.

NOTICE TO MARINERS No. 222.

[Second Publication.]

CHINA SEA—BORNEO.

Fixed harbour light on Sandilands rock—Kudat harbour entrance.

IN continuation of Notice to Mariners No. 57, dated 23rd March 1891, issued by this Office, the British Admiralty has given notice (No. 543 of 1891) that the light on Sandilands rock is exhibited :—

Sandilands rock light is a *fixed harbour* light of low power ; it shows *white* between the bearings of N. by W. $\frac{3}{4}$ W., through west, and W. by S. $\frac{1}{4}$ S. ; *red* between S. W. $\frac{3}{4}$ S. and S. by W. $\frac{1}{4}$ W. ; *red* between S.E. $\frac{3}{4}$ E. and E. $\frac{3}{4}$ S. ; and *white* between E. by N. $\frac{1}{4}$ N., through north, and N. by W. $\frac{1}{4}$ W. ; in all other directions it is obscured. It is elevated 7 feet above high water, and should be seen in clear weather from a distance of 2 miles.

The light-house, erected on piles, is about 10 feet high.

Approximate position, lat. $6^{\circ} 52' 20''$ N., long $116^{\circ} 52' 5''$ E.

Also that the *fixed white* light, previously shown from the fort at Kudat, has been discontinued.

NOTICE TO MARINERS—No. 223.

[Second Publication.]

AUSTRALIA—CAPE BOUGAINVILLE.

Sunken rocks and shoals in the Inner and Outer Routes.

THE British Admiralty has given notice (No. 552 of 1891) of the existence of the undermentioned sunken rocks and shoals lying in the Outer and Inner Routes, off cape Bougainville, the result of recent examination of the locality.

Outer Route.

1. A rock (*Oliver rock*) consisting of a coral head, with 9 feet water over it, and 25 fathoms close around, lies with the south extreme of Cassini island bearing N. 80° E, distant $4\frac{3}{10}$ miles. The sea was not seen to break on this rock, the *Pengais* passed over it without observing any sign of shoal water.

Approximate position on Admiralty charts, lat. $13^{\circ} 56\frac{1}{2}'$ S, long. $125^{\circ} 39\frac{1}{2}'$ E.

NOTE.—The rock marked awash in lat. $14^{\circ} 0' 30''$ S., long. $125^{\circ} 35'$ E., does not exist.

2. A shoal (*Bassett-Smith shoal*) about one mile in diameter, with general depths of 5 to 6 fathoms, and 50 fathoms around, with a head of 20 feet near its western edge, is situated in approximately lat. $13^{\circ} 16' 50''$ S., long. $125^{\circ} 50'$ E. The sea did not break on this shoal, and there was no appearance of danger in the vicinity.

3. *Penguin shoal*, situated in approximately lat. $13^{\circ} 6'$ S., long. $126^{\circ} 4\frac{1}{2}'$ E., has a least depth of 6 fathoms over it.

4. A rock (*Warn rock*) consisting of a small coral head, with 6 fathoms over it, lies in approximately lat. $13^{\circ} 8\frac{1}{2}'$ S., long. $126^{\circ} 11'$ E.

Inner Route.

1. A coral pinnacle (*Lee rock*) with 8 feet water on it, and 10 to 17 fathoms close around, lies with Pascal island summit bearing S. 83° W., distant $7\frac{2}{10}$ miles, or in approximately lat. $14^{\circ} 2'$ S., long. $125^{\circ} 52'$ E. The *Penguin* passed twice within a few feet of this rock, but no indication of danger was seen.

2. A coral shoal (*Tancred shoal*), 7 cables in diameter, with 3 to 7 fathoms over it, and 16 to 22 fathoms around, lies with Low rocks summit bearing No. 56° W., distant 2 miles, or in approximately lat. $14^{\circ} 3\frac{3}{4}'$ S., long. $126^{\circ} 0'$ E.

3. The extensive reef charted north of Gibson point does not exist, but there is a rock (*Fury rock*) awash at high water, lying with the islet north of Gibson point bearing East, distant $1\frac{2}{10}$ miles. A reef dry at low water, extends 4 cables north-west of this rock, and foul ground for a distance of $1\frac{2}{10}$ miles north of it. Approximate position, lat. $13^{\circ} 56\frac{1}{2}'$ S. long. $126^{\circ} 4'$ E.

4. *Bishop rocks* consist of a small group of coral heads, drying 2 feet at low water, and lying with the north extreme of Troughton island bearing S. 75° E, distant $2\frac{1}{10}$ miles, or in approximately lat. $13^{\circ} 42\frac{1}{2}'$ S. long. $126^{\circ} 12'$ E.

5. A coral reef, with 2 fathoms over it, lies with the north extreme of Troughton island bearing S. 50° E., distant 6 $\frac{1}{10}$ miles, and is separated by a deep channel from the south point of Eastern Holothuria reef. Approximate position, lat. 13° 39 $\frac{1}{4}$ ' S., long. 126° 9 $\frac{1}{4}$ ' E.

6. *Branch Banks* consisting of two coral shoals with 6 and 7 fathoms over them, lie with the north extreme of Troughton island bearing S. 18° W., distant 8 $\frac{1}{10}$ miles, or in approximately lat. 13° 35 $\frac{1}{2}$ ' S., long. 126° 17' E. Depths of 6 fathoms were obtained for a distance of one mile east of this position.

CAUTION.—As in the neighbourhood of the dangers off cape Bougainville the tides are strong, the banks and reefs steep-to, and the water unusually turbid, great care is necessary when navigating in the locality.

The depths given are at low water spring tides.

NOTICE TO MARINERS—No. 224.

[Second Publication.]

AUSTRALIA—VICTORIA.

Uniform system of buoyage.

The British Admiralty has given notice (No. 583 of 1891) that the following uniform system of buoyage, somewhat similar to that adopted in the United Kingdom, was and will be established at ports in the Colony of Victoria, at the dates hereinafter mentioned:—

- (1) The term *Starboard Hand* shall denote that side which would be on the right hand side of the mariner, either going with the main stream of flood, or entering a harbour, river or estuary from seaward; the term *Port Hand* shall denote the left hand of the mariner under the same circumstances.
- (2) Buoys showing the pointed top of a cone above water shall be called *conical*, shall be painted red, and shall always be *Starboard Hand* buoys, as above defined.
- (3) Buoys showing a flat top above water shall be called *can*, shall be painted black, and shall always be *Port Hand* buoys, as above defined.
- (4) Buoys showing a domed top above water shall be called *spherical*, and when used to mark middle grounds shall always be distinguished by horizontal stripes of white colour.
- (5) Surmounting beacons, such as Staff and Globe, &c., shall always be painted of one dark colour.
- (6) Staff and Globe shall only be used on *Starboard Hand* buoys, Staff and Cage on *Port Hand*, Diamonds at the outer ends of middle grounds, and Triangles at the inner ends.
- (7) Buoys for marking Submarine Telegraph Cables shall be painted green, with the word *Telegraph* painted thereon in white letters. Mooring buoys shall be continued as heretofore. Gas buoys shall be painted red or black to correspond with the side of the channel on which they may be moored.
- (8) The buoyage of the West, South, and Geelong channels, port Phillip, will be altered to conical and *can* shaped buoys.
- (9) The buoyage of Sorrento and Cole's channel, port Phillip, also of Western port, port Albert, and Corner inlet, will remain of the same shape as heretofore, but all *starboard hand* buoys or beacons shall be painted red, and all *port hand* buoys or beacons shall be painted black.
- (10) The alterations in the buoyage of the several ports and channels have been and will be made during the following months and years:—

Western port	September 1891.
Port of port Albert	October 1891.
Port of Geelong, and entrance thereto from port Phillip	November 1891.
West channel, port Phillip	February 1892.
Port of Corner inlet	March 1892.
South channel, port Phillip	June 1892.
- (11) BUOYING AND MARKING OF WRECKS. All buoys and topsides of vessels used for marking wrecks shall be painted green, with the word *Wreck* painted thereon in white letters, and when practicable shall be moored near to the side of the wreck next to mid-channel.

(12) When a wreck-marking vessel is used, she shall exhibit:—

By day: Three balls 20 feet above the level of the sea, two placed vertically at one side of the vessel, and one on the other side, the single ball being on the side nearest to the wreck.

By night: Three *fixed white* lights, similarly arranged, but not the ordinary riding light.

[Second Publication.]

AUSTRALIA—MARY RIVER.

New leading marks, Horseshoe bend.

THE Port Master, Brisbane, has given notice (No. 34 of 1891) that two White Triangular Beacons have been erected on the south bank of the river, near Turkey Creek, to lead through the upper part of the Horseshoe Bend.

Directions.—After rounding the bend and passing a black buoy, haul up to bring these beacons in line. Steer with them in line until past the red buoy, when proceed as usual. The channel, the centre of which is marked by this line of beacons, is 150 feet wide, and has a minimum depth of 10 feet at low-water springs.

[Second Publication.]

AUSTRALIA—TORRES STRAIT.

Reported reef in western approach to Prince of Wales, Channel.

THE Port Master, Brisbane, has given notice (No. 35 of 1891) of Mr. Frank Jardine having crossed an unknown reef of small extent, with apparently not more than 6 feet over it at low-water springs, whilst sailing up to Thursday Island in a lugger.

When upon it his estimated position was about 5 miles west by north from Quoin Point, Goode Island. Very shortly after passing over it, whilst steering southerly, the Government Residency on Thursday Island opened clear of Quoin Point. Vessels are therefore cautioned to keep the Residency well open to the southward of Quoin Point when approaching from or leaving for the westward, and to exercise great care whilst in the locality.
